List is due to change if the scenery of the camp changes. Also, when you're contacting us, please answer:

When can we use the equipment? The whole week, one day, only during the evening?

Who is going to take care of the material: are you staying to guard your material, will you operate etc?

Will it cost something (preferably not of course)?

How will it reach the no border camp? Will you transport it, do we have to look for transport?

Some way of contacting you: email, telephone, fax, meeting place?
